The Powerpage System interfaces directly with the Gaming Loyalty System to enable full alphanumeric paging from the Gaming Floor to any individual pager and/or pager group. The system also features reminder call capabilities, which will continue to page the attendant until the call is acknowledged.

The System can be configured to send all calls to a pager, or separate the calls to be sent to designated Drinks or Service pagers.

The Powerpage Gaming Transmitter supports twelve hard wired contact alarms, enabling staff to page managers for assistance, emergency or duress alert.

The Paging Button is pressed by the Player

The paging request is received by the Loyalty System PC and sent to the Powerpage Transmitter

The Transmitter receives the paging request and sends the message to a pager

Advisor II Alphanumeric Pager

J22 Alphanumeric Pager
