PokieCall

PokieCall can instantly contact gaming staff

BluFi Call Systems provides the ideal solution for Gaming Paging communications in Pubs and Clubs. Developed to provide direct communications between staff and patrons the PokieCall System is ideal for ventures not equipped with a Gaming Loyalty system, and provides full alphanumeric paging to the gaming floor.

The PokieCall System features:

- Real-time communication between patrons and gaming staff
- Improved customer service levels
- Full alphanumeric messaging
- Reduction in machine downtimes
- No computer or software required
- Superior 4 watt transmitter for high quality in-building coverage
- Supports over 100 gaming machines
- Improves staff awareness and efficiency
- Full training and support
- A range of pagers available
- Can be interfaced to Genesis and BluFi Genesis Blu

System Specifications

- 2, 4 or 8 line Alphanumeric Pagers
- Easy to read alphanumeric text
- Rugged and reliable design
- Bright backlit display
- VHF and UHF Frequencies
- Low Battery Indication
- Supports up to 12 Hardwired Alarms, eg Duress Buttons, Fire Panel, etc.
