

WaiterCallSystem

*Jtech provides the ideal solution for waiters paging communications in all food service outlets. The **JTECH WAITER PAGING SYSTEM** has been developed to provide seamless communications between kitchen and waiter staff.*

The Waiter Paging System eliminates noise pollution caused from overhead paging systems, or the use of numbered light boards in dining and a la carte Clubs, Hotels and Restaurants.

Staff are alerted via the silent vibrating pagers

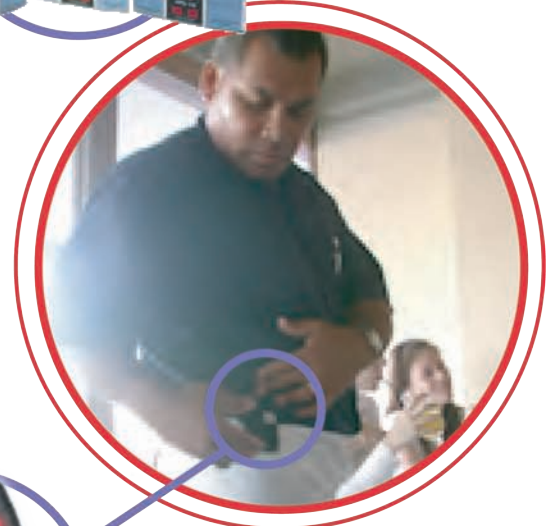

SYSTEM BENEFITS:

- * Eliminates the need for numbered light boards
- * Eliminates the use of Public Address Systems
- * Eliminates cold food complaints
- * Provides communication between chefs and waiters
- * Improves atmosphere and environment
- * Eliminates missed food orders

The Waiters System provides a convenient means of communication between kitchen and waiter staff. Customers remain relaxed with the table service, providing a more relaxed, customer focused environment for the dining patrons. The silent vibration ensures that nobody misses their call when the meal is ready.

SYSTEM SPECIFICATIONS:

- * UHF Transmitter
- * 8, 16 or 32 Button Transmitter
- * RECHARGEABLE Vibrating Pagers
- * Pager Charging Rack Houses ten (10) Pagers
 - * 500m Range
 - * 12-Month Warranty
